LAST CHANCE DEALS!!!

Evinrude E-Tec

A two-stroke direct-injection technology that outperforms its rivals.

POWER AND PERFORMANCE

The E-TEC direct injection system delivers the precise amount of fuel needed, so you'll burn less at idle and throughout the RPM range. So, when you hammer the throttle and instantly get on plane, you'll really feel the power.

HASSLE-FREE

All Evinrude E-TEC engines have no break-in period, an auto-winterization feature and never needs an oil change. You'll only need dealer-scheduled maintenance every 3 years or 300 hours.

CLEANER TECHNOLOGY

Produces fewer reportable emissions and requires no oil changes. Which means no worries about disposal or where the oil ends up. Every drop of oil in the fuel mix goes into combustion, not the air or water.
